

## TECHNICAL DATA SHEET

# Solvent 701

Solvent 701 has been designed as a non-toxic replacement for using methanol. It is a fast-evaporating solvent and industrial cleaning agent.

### TYPICAL PROPERTIES

<b>Type</b>	Cleaning solvent used to for wide range of substrates and soils.
<b>Appearance</b>	Clear liquid
<b>pH</b>	Typically, pH 7
<b>SG</b>	Typically, 0.79
<b>Solubility</b>	100% in water

### RECOMMENDATIONS FOR USE

<b>Temperature</b>	25-40°C.
<b>Time</b>	Solvent 701 will clean a wide range of soils, oils and greases successfully within the time range of 1 minute to 5 minutes. The cleaning will be improved by agitating the working solution by use of a recirculation pump, mechanical stirring or other method.
<b>Application</b>	Parts should be immersed in the working solution at temperatures and for times as recommended above. If possible, working solutions should be adequately agitated by e.g. recirculation pump, mechanical stirring or agitation.  Parts can also be cleaned using saturated wipes.
